Hi Nikki,

Attached is the table that Bev provided but modified to reflect units/acres as of 12/5/2012.

The 12/5/2012 date corresponds with the data tables that Ilana keeps and the update she did closest to the end of 2012. And there are some minor acre differences in a few of the categories where the number of units did not change. I assume these were minor corrections to GIS data or small land exchanges, etc.

And as Clayton's email below points out, there was a significant change in the total acres, as well as fewer national monuments and more WSAs.

Let Clayton and I know if you have questions. And thanks to Clayton for the work!

Sally

Sally,

I went through some statistics spreadsheets in the share drive, and made the necessary updates.

There was a significant change in the total acres, as well as fewer national monuments and more WSAs. I have also attached the spreadsheets that I worked from.

Hope this helps.

Clayton,

Can you update the attached so it's accurate back to 2012? By today? You should be able to use Ilana's stats tables for this, and go by designation date to update it.

Thanks! Sally

Hi, Happy friday. Bev's team is working on a BLM history publication and it goes through 2012. They have this table for NLCS but it goes to 2013. She's wondering if we can update the table acres/#'s so it works through 2012. I'm thinking much of it would be the same but wanted to double check with the data experts. She needs it back by Tuesday if possible but I'm thinking if we can get this one done today we won't have to worry about it next week?

Thanks!

^{*}The BLM is evaluating how to incorporate the California Desert Conservation Area (CDCA) into the NLCS in terms of management. The BLM-administered portion of the CDCA (including wilderness areas) totals 10,772,600 acres and includes some multiple use areas not traditionally incorporated in the NLCS.
